A waterproof safety boot in a strong textile upper material with reflective threads and a TPU-reinforced toe part. Thinsulate™ insulation provides a good climate in the boot, even in colder temperatures.

Composite toecap and a soft, flexible penetration-resistant midsole that withstands the tough demands of 3 mm nails (PS). The friction outsole in nitrile rubber is developed to provide a good grip even on snow and ice.

For maximum comfort and ankle support, the inside of the boot shaft has a high-quality PU foam in two different densities. The insole, with anatomical support, is made of a soft PU material covered with a textile surface with good moisture absorption.

The membrane will keep you dry throughout the day, and the Freelock system makes it easy to jump in and out of the boot.

Best suited for outdoor work within building and construction, transport, maintenance, repair and operation. Women's last in UK sizes 2-6.

Lining:

Thinsulate, Membrane

Upper material:

Textile

Fit:

Wide

Nail protection material:

Textile PS

Toecap material:

Composite

Functionality:

Freelock, Padded shaft edge, Antistatic properties, Heel reinforcement, Oil resistant outsole, Reflective details, Toe
