Premium boots of the highest quality and comfort. A durable and water repellent upper material in nubuck leather, with reinforcement on the toe and heel. The side mounted Freelock system makes it easy to tighten and adjust the fit throughout the day. Neoprene tongue for increased comfort.

The boots have a metal free composite toe cap and a soft, flexible nail penetration protection that meets tough standards with thinner 3 mm nails. Anatomically designed insole made of a soft and shock-absorbing ETPU material, which in combination with the moisture absorbing textile closest to the foot provides superior comfort.

For maximum comfort and ankle support, the inside of the boot shaft has a high-quality PU foam in two different densities. Slip resistant outsole made of nitrile rubber, while the midsole is made of PU for optimal shock absorption.

These boots are suitable for work in building & construction, transport, maintenance, repair and service. Women's last in sizes 35-39.

Durable and water repellent upper material in nubuck leather

Freelock lacing system on side

Neoprene tongue adds to the comfort

Metal free composite toe cap

Flexible non-metallic penetration resistance in PS standard

Anatomically designed insole made of soft and shock-absorbing ETPU material

The design of the sole provides stability and support on ladders and uneven surfaces

Slip resistant outsole in nitrile rubber

Colors

Upper material:

Oily treated leather

Fit:

Wide

Nail protection material:

Textile PS

Toecap material:

Composite

Functionality:

Freelock, Antistatic properties, ESD approved (confirms with IEC 61340-5-1), Heel reinforcement, Oil resistant outsole, Padded boot shaft, Toe reinforcement, Heat resistant outsole, Water repellent, Breathable insole

Insole material:

Textile, responsive ETPU

Sole material:

PU midsole, nylon shank, Nitrile outsole

Lining material:

Polyester
