

Sizes

35-48

Certifications:

EN ISO 20345:2022 S1PS FO SR HRO SC

A cool and airy high-quality sneaker. It features an exclusive, textile upper with breathable panels and extra reinforcement over the toe cap.

The Freelock lacing system allows for easy entry and exit from the shoes. The neoprene tongue adds to the comfort.

The shoe is equipped with a NANO composite toe cap, which is both lighter and stronger than other non-metallic materials. The soft and flexible nail penetration protection meets tough standards with thinner 3 mm nails.

The innovative three-layer sole construction ensures unique shock absorption. The outer sole is made of non-slip nitrile rubber, while the midsole consists of two layers of PU in different densities for optimal function and comfort.

The insole, anatomically designed for the best comfort, is made from soft ETPU material and features a textile upper with excellent moisture absorption.

This shoe is well-suited for work in building, transport, maintenance, repair and operations. Women's last in UK sizes 2-6.

Innovative triple density sole construction ensures unique shock absorption.

Slip resistant outsole in nitrile rubber
