Three to be™ - Triple Density Injection

Three to Be® - Tripla Densità Iniettata technology represents one of the most advanced results of our R&D efforts. Patented by Giasco, it integrates three entirely polyurethane-injected sole layers to optimize safety shoe performance in terms of comfort, stability, and slip resistance.

Anti-Torsion Sole

The Anti Torsion system uses a thermoplastic shank designed to increase stability on irregular and wet surfaces. Unlike standard shanks, it flexes with the foot's natural motion, reducing the risk of twists and falls. Ideal for outdoor work, especially in construction, where surface control is critical.

3RUN Agility

3Run is a sporty and youthful line developed for those who work both indoors and outdoors on regular surfaces. Specifically, the design of this safety shoe is inspired by running shoes, combining soft volumes with sharp lines. The tread, on the other hand, is designed for indoor use. This is made possible by a dense pattern of lugs that together provide excellent slip resistance for this safety shoe.
